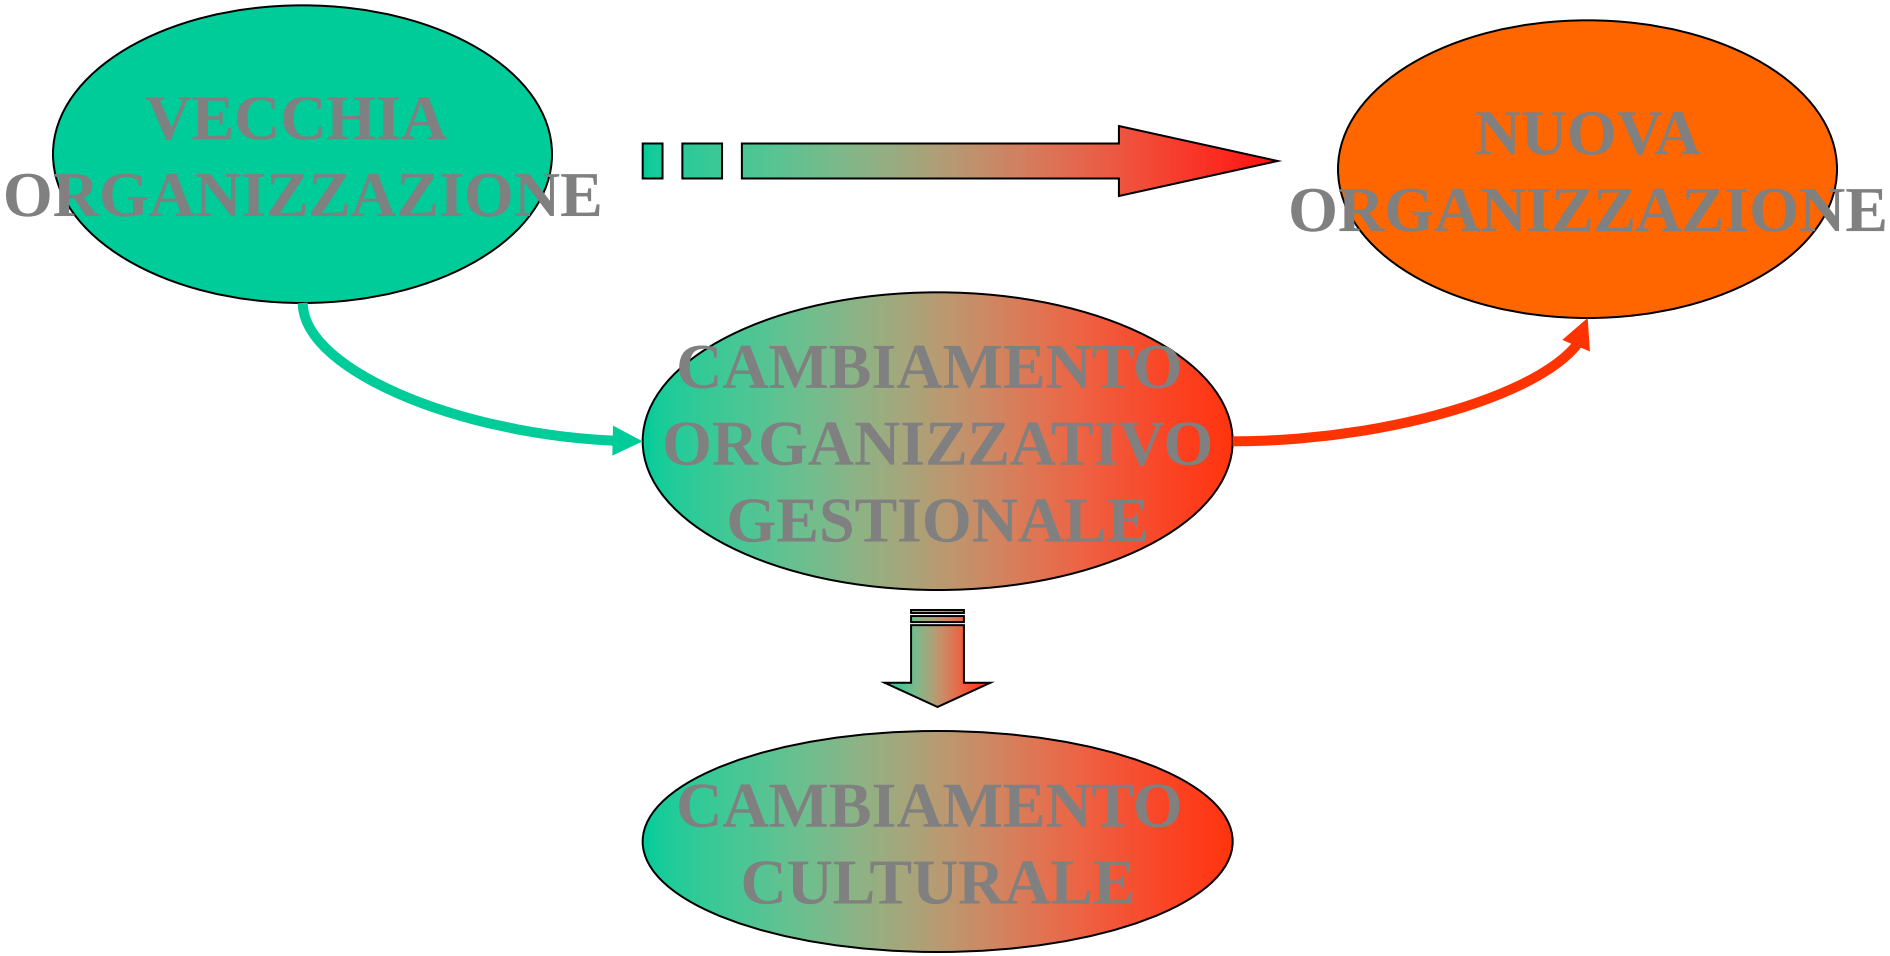
Healthcare Errors – Not a New Problem

“. . . even admitting to the full extent the great value of the hospital improvements in recent years, a vast deal of the suffering, and some at least of the mortality, in these establishments is avoidable.”

Florence Nightingale, 1863

". . . pur ammettendo tutti i miglioramenti degli ospedali negli ultimi anni, la maggior parte delle sofferenze, e almeno una parte della mortalità, in questi ospedali è evitabile ".

CAMBIAMENTO



Obiettivo:

Superare metodologie “obsolete”

Health policy decision making

Muir Gray JA, 1997

Evidence ≠ evidenza

In Italiano

- È evidenza qualsiasi cosa che sia palese e chiara, per la quale non è necessaria una ulteriore dimostrazione.

In Inglese

- È evidenza qualsiasi cosa che ha provato la propria validità mediante il metodo scientifico. È evidenza ciò che è stato dimostrato.

Utilizziamo sempre le evidenze scientifiche…

… Considerazioni

- "Meno del 20% di ciò che i medici fanno ogni giorno possiede almeno uno studio clinico ben disegnato a sostegno della sua utilità."

Cochrane A.L.:*" Effectiveness and Efficiency. Random reflection on Health. Service"* Nuffield Provincial hospital trust , London , 1972.

E quello che fanno gli infermieri?

Il Codice deontologico dell'infermiere

Capo III

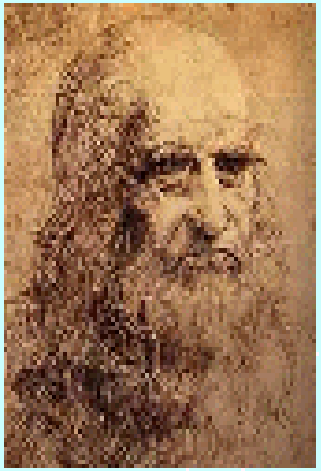
- ***Articolo 11***

  L'infermiere fonda il proprio operato su conoscenze validate e aggiorna saperi e competenze attraverso la formazione permanente, la riflessione critica sull'esperienza e la ricerca. Progetta, svolge e partecipa ad attività di formazione. Promuove, attiva e partecipa alla ricerca e cura la diffusione dei risultati.

- ***Articolo 12***

  L'infermiere riconosce il valore della ricerca, della sperimentazione clinica e assistenziale per l'evoluzione delle conoscenze e per i benefici sull'assistito.

Le "scienze"



Nessuna umana scienza si può dimandare vera scienza se essa non passa per le matematiche dimostrazioni.

Leonardo da Vinci (1452-1519)

"Infermieristiche"

SIGNIFICATO ED IMPORTANZA DELL'USO DI CINAHL

- CINAHL INDEX: Cumulated Index for Nursing & Allied Health Literature
- E' la Banca dati di ricerca ed aggiornamento in ambito infermieristico piu' omnicomprensivo ed autorevole del mondo
- Sono indicizzate oltre 5000 riviste autorevoli in ambito infermieristico, edite dai piu' importanti editori accademici in 40 lingue e provenienti da decine di paesi
- Oltre ai riferimenti bibliografici sono disponibili i testi integrali di oltre 770 riviste. Sono anche disponibili libri in testo integrale, CEUs, dissertazioni e altre fonti di conoscenza rilevante
- Oltre 3,8 milioni di records a partire dal 1932
- Cinahl Mesh: Contiene la mappatura semantica ed ontologica di tutti i concetti correlati in una struttura ad albero
- Centinaia di analisti che creano i metadati per ogni pubblicazione.

SIGNIFICATO ED IMPORTANZA DELL'USO DI CINAHL

- Cinahl consente di accedere agli studi piu' importanti pubblicati nella letteratura scientifica mondiale garantendo al professionista un aggiornamento efficace ed un miglioramento continuo delle sue capacità e competenze.

- Ogni utente puo' creare un proprio profilo personale ove depositare in modo permanente tutte le bibliografie ed i testi integrali di interesse intercettati durante le sessioni di ricerca. E' possibile anche salvare le ricerche in modo permanente ed attivare alerts su specifici topici clinici
